

**Lender List** is our online application within the agentTRAX suite that allows letterTRAX users to manage Lender information used for prior issued CPL letters.

Each time a CPL letter is issued through letterTRAX for a new lender, that lender information is added to the user's Lender List.

Lenders located in the Lender List are also added to a universal database for access by CPL users nationwide.

Users can remove lenders from the Lender List by accessing from the Applications menu option "My Lender List".

A user can copy another user's Lender List by selecting the *Details* option and entering the email address of the user that they wish to copy.

Lender information cannot be edited in Lender List. If the information is incorrect, delete the entry and it will update with the correct information upon issuance of the next CPL letter using that Lender.

The list of stored lenders can be exported by the user by selecting the *Export* option at the bottom of the list.
